**Oregon Heat's Mission:**

To develop and coordinate resources to help low-income Oregonians meet their energy needs and achieve energy self-reliance through energy education and advocacy.

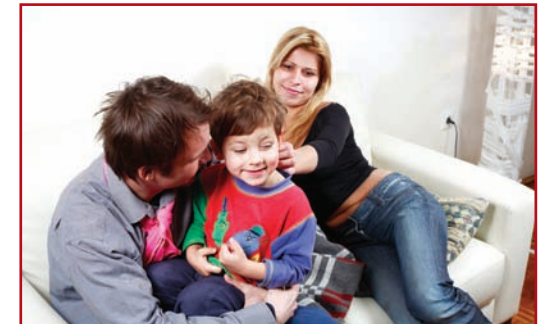

**Oregon HEAT** was founded on the concept of neighbor helping neighbor. With your help, we are able to keep the heat and lights on for thousands of our neighbors facing hardship, including the elderly, families with children, the unemployed & working poor, and the disabled.

# OREGON HEAT'S OIL RECYCLING PROGRAM

In November 2007, Oregon HEAT partnered with Oil Re-Refining Company (ORRCO) to pick up and recycle used petroleum. Oregon HEAT is paid by ORRCO for the pre-recycled value of the used products they collect. We then provide these funds back to our community-based partner agencies to use for emergency energy assistance for families in critical need of heat and lights.

## Why should my business **GET INVOLVED** with the Oil Recycling Program?

Donating your used petroleum to Oregon HEAT is a way to potentially reduce operating costs associated with having it picked up and hauled away.

### IT'S LOCAL

Your used petroleum donations are converted to funds that help families in your local area who are in critical need of heat and lights.

### IT'S EASY

We will work with you to start your regularly-scheduled collections by ORRCO. You don't have to do anything different to the used oil you are already collecting and storing. It's that easy!

### IT'S REWARDING

You will reap the benefit of being publicly recognized as an organization that cares about helping their neighbors.

### IT'S GREEN

Re-refining used petroleum products is recognized by the EPA as the most energy-efficient and environmentally-friendly disposition for used petroleum products.

## Winning ways **FOR** the Environment

- Used oil can be re-refined over and over again without wearing out—true sustainability.
- Burning used oil expels harmful materials into the environment including lead, cadmium, chromium, zinc, and sulfur. Re-refining used petroleum keeps these toxic materials out of our air, water and landfills.
- It takes 42 gallons of crude oil to produce 2 ½ quarts of high quality lubricating oil. It only takes one gallon of used oil to produce the same amount!
- ORRCO will safely and professionally collect your used petroleum so you don't have to worry about what to do with it.

## It's easy to get started

If your business has used petroleum that you would like to donate to Oregon HEAT, please contact us at:
